ST250

High performance tubular skylight with 97% total reflective Silvertube™ light shaft for task lighting and small areas.

Skytube Intech® 250

To Specify

"Natural light to be 'Skytube Intech® 250' as manufactured by Skydome Skylight Systems Ltd, phone 131424.

Model: ST250
Roof Type: please specify (refer order codes below)

> ***Recommended additional text in specification:***
> Must be third party certified compliant to AS4285.
> Kit must contain 97% reflective tube, variable pitch adaptor (VPA) and Intech device. Phone 131424... sales@skydome.com.au
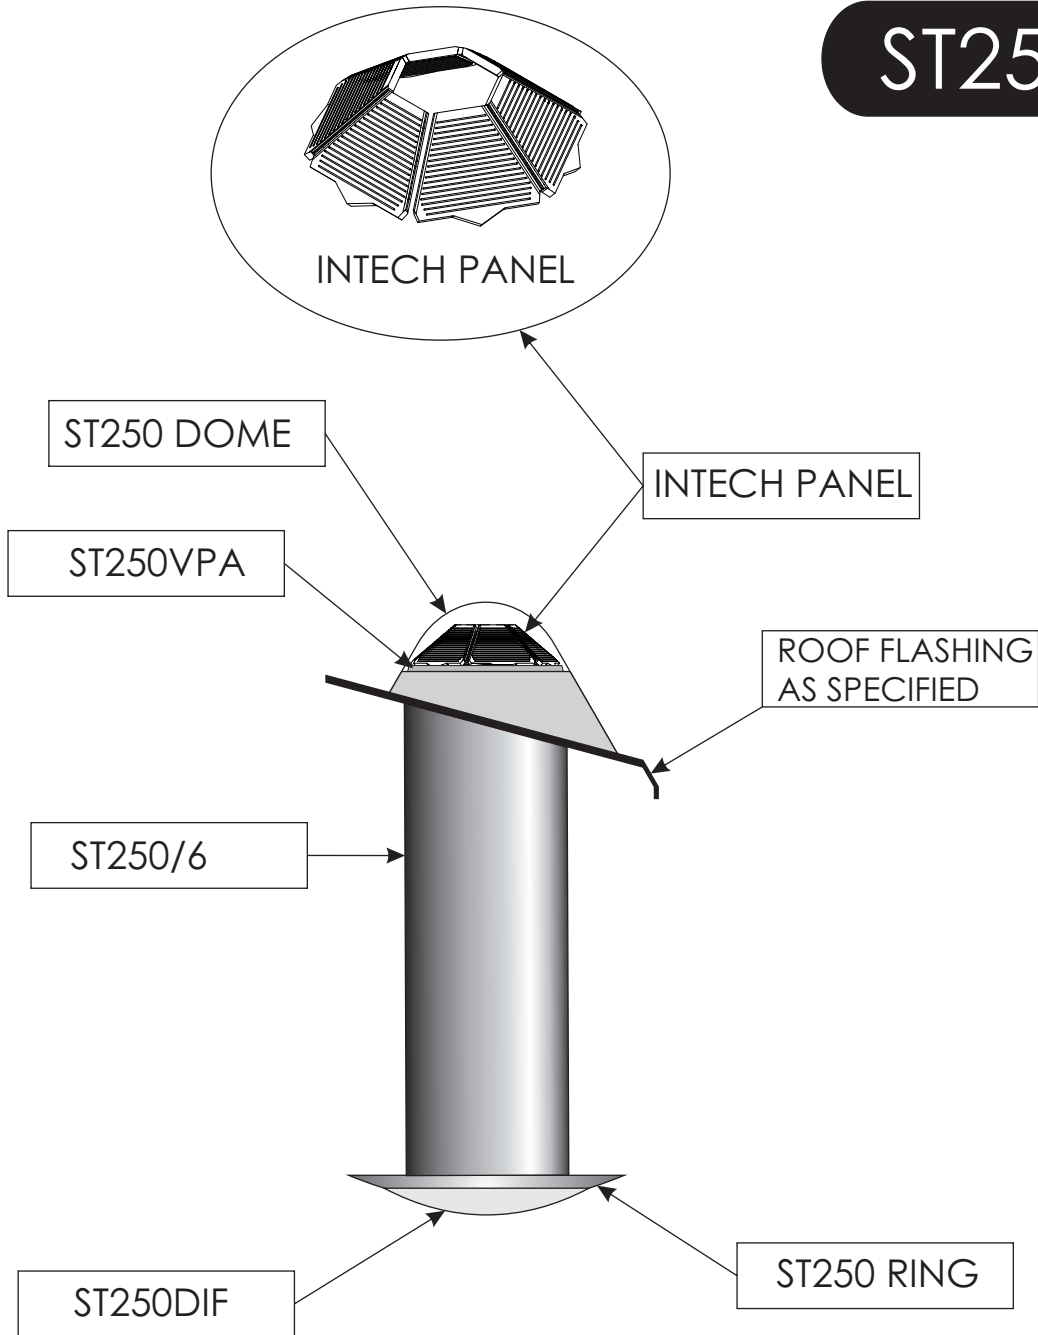

Features

✖ Patented Intech® light intercepting device captures low elevation sunlight from any direction (a world first) providing improved performance morning and afternoon when the sun is at its weakest.

✖ Patented Variable Pitch Adapter (VPA) optimises light throughput. It allows the Skytube® to be installed almost anywhere without the need for light reducing angle adapters, providing a direct path for the light from roof to ceiling 'because light doesn't travel around corners'.

✖ High performance Silvertube™ light shaft providing 97% total reflectance.

✖ Easily installed into most roof types using Skydomes unique roof profiles.

✖ Ideal for Bathrooms/WC's/Ensuites/Hallways/WIR and all task lighting applications.

✖ Tested and certified to AS4285 (skylights).

✖ Benchmark product for energy efficiency, current energy rating schemes are not sophisticated enough to rate the Intech® products, however research is currently underway to overcome this failing.

Model (for required roof profile)

Order Code	Description
ST250**TT**	Terracotta Tile
ST250**CT**	Concrete Tile
ST250**CR**	Corrugated Profile
ST250**MD**	Metal Deck Profile
